MADE IN CHINA is a project in which artists and art professionals assume responsibility for their work, from production to presentation and sale.

The International Centre of Graphic Arts in Ljubljana serves the project as an exhibition venue for the currently available production of MADE IN CHINA – a place of occasional events related to the project and a place where affordable purchases can be made, through which the visitor can become the owner of original art pieces, hence contributing to the development of the project and the visual arts.

The MADE IN CHINA multiples are both commodity and artwork, whose goal it is to find the path of art to the audience. This is why the project strives to not negate that which it is – an art project – and that which it wishes to become – the beloved object of adoration on the consumer's shelf.
